

Portable F-16 FIRETRAINER[®] O-100

Fully Portable

Easy to Operate

Easy to Maintain

No Infrastructure Required

KFT[™]
FIRE TRAINER

REALISTIC FIRE | HAZMAT | EMERGENCY TRAINING SOLUTIONS

kft.firetrainer.com

KFT's Portable F-16 FIRETRAINER® O-100 is designed for training response personnel in F-16 fire emergencies. KFT's integral multi-zone burner design allows users to simulate numerous scenarios at the push of a button. Safety and repeatability are paramount, with the operator safely controlling the training scenarios. The operator/instructor controls a 'deadman' button that when released instantly stops the fire.

The Portable F-16 FIRETRAINER® O-100 is a standalone trainer that can also be partnered with the custom, self-contained O-100 trailer to allow the F-16 to be transported so that fire training can be conducted virtually anywhere.

The F-16 FIRETRAINER® is extremely versatile with the ability to produce scenarios such as:

- an engine fire
- a fuselage/tail engine fire

KFT's FIRETRAINER® O-100 systems are CSA certified and certified to UL safety standards by Intertek (ETL), a Nationally Recognized Testing Laboratory (NRTL).

Specifications

F-16:

- construction: painted steel with removable aluminum nose cone
- dimensions 24'1"L x 17'11"W (wings down) x 7'11"H
- features 1 cockpit seat, 1 engine
