

# Thomson Airways Training Centre

Derbys, United Kingdom

*Seat Fire*

*Toilet Waste Bin Fire*

*Overhead Locker Fire*

## Mobile Cabin Crew FIRETRAINER® MA-500

The mobile Cabin Crew FireTrainer® MA-500 KFT Fire Trainer have provided to Thomson Airways is a propane fueled live fire training system dedicated to educate, train, and certify cabin crew personnel in the control and extinguishment of aircraft cabin fires.

The trainer is housed in a converted 6 m ISO container equipped with heat protection and robust, life-like appearing mock-ups to ensure a long operational life. Its rather minimalist design represents an even more economic approach in comparison to the cabin crew trainer KFT Fire Trainer have provided to Aeroflot in 2007.

- 3 Cabin Fireplaces:
  - Seat Fire
  - Toilet Waste Bin Fire
  - Overhead Locker Fire

**Delivered:** September 2010

**Fueled by:** Propane
