

# Fire and Rescue Department of Bas-Rhin (SDIS 67)

Strasbourg, France

*Flashover*

*Galley Fire*

*Ship Motor Fire*

## Maritime FIRETRAINER® T-500

This structural training system was integrated into an existing ship, which was converted for training purposes. The whole training facility was founded by the EU program „INTERREG IV Oberrhein/Rhin supérieur (CRERF)“ for the maritime fire fighters of the French „Fire Department of Bas-Rhin (SDIS 67)“ and is also used by numerous fire brigades located around the Rhine from France over Germany to Switzerland.

The ship is equipped with several different training areas like a rescue training area for overboard personal, crashed container training area and a live fire training area.

KFT Fire Trainer's scope of work comprised of the installation of the following fire places including semi-automatic T-500 control system and heat linings:

- Galley Fire (with wall cupboard)
- Ship Motor Fire
- Berthing Bed Fire
- Flashover
